Objective

To understand why there is something it is like to be me. That has always been my primary objective, but i first took nearly a decade teaching myself and then researching graph coloring to prove to myself that i could excel at something “hard”. Now i am teaching myself all things machine learning as a first step toward the objective. It is only logical that i work at Google Brain.

Education

Ph.D., Mathematics Arizona State University Research: Discrete math, graph coloring, games and algorithms. Advisor: Hal Kierstead	2011 - 2013
M.A., Mathematics University of California, Santa Barbara	2003 - 2005
B.A., Mathematics Washington University in St. Louis Ross Middlemiss Prize (for top graduating Mathematics major) Study Abroad in the Netherlands (Utrecht University)	1999 - 2003 2001 - 2002

Work History

CTO, Co-founder LBD Data	2008 - 2017
<ul style="list-style-type: none">Contract development for Safety Vision, a producer of mobile video solutions for police and public transit.Wrote SafetyView (C#)<ul style="list-style-type: none">P/Invoke wrapper of libavcodec for H264/MPEG4 decoding, up to 12 channel playback at once.Vehicle location display via embedded Google map (JavaScript).Custom AVI writer for export.Shareable web links, multichannel playback in HTML5 for mobile (using Amazon S3 with DynamoDB).Both WinForms and WPF versions.Wrote SafetyNet (C#)<ul style="list-style-type: none">Automatic wireless download of video from vehicles.Video searchable by metadata in database (SQL).Streaming video to SafetyView.Wrote LiveLook (C++ / C#)<ul style="list-style-type: none">Live playback of multiple IP camera streams.Uses LIVE555 to eat the streams, passing frames up to a C# WPF viewer.Contract development for ipDatatelWrote uDownloader (C#)<ul style="list-style-type: none">NT service that talks to household appliancesTray application to monitor connections, view data transmissionMade custom version of com0com null-modem emulator driver (C++)	
Adjunct Assistant Professor Mathematics Department Franklin & Marshall College	2014 - 2016 Lancaster, PA
<ul style="list-style-type: none">6 sections of Calculus.	

- 3 sections of Algebra & Trigonometry.

Senior Software Engineer

Wall Street On Demand

2010 - 2011

Boulder, CO

- Made an attribute-based runtime object to/from stream protocol mapping engine using compiled expression trees in C#.
- Heavily optimized the mapping of built-in types to/from the stream protocol achieving a 10x speed increase.
- Optimized the memory profile of the multithreaded socket server by writing a lockless thread-safe memory pool in C#. This allowed the server to handle a 2x increase in load.

Senior Software Engineer

Synaptics

2009 - 2010

Santa Clara, CA

- Debugged and fixed issues in the Synaptics TouchPad driver, ranging from blue screens to gesture recognition problems (C++).
- Built a tool to play back and analyze gestures from customer log files (C#).
- Built a tool to verify and optimize driver INF files (C#).

Software Engineer

Wall Street On Demand

2007 - 2009

Boulder, CO

- Rewrote the company's entire distributed computing layer in C#. This included the implementation of socket based clients and servers that communicate using the company's custom data transfer protocol.
- Wrote large portions of Goldman Sachs' (the parent company) new C# financial plotting tool.
- Built the foundation for the company's new chart and pdf generation server. This uses WPF to generate thumbnail charts for web pages as well as creating complete stock and research reports.

Scientific Programmer

L-3 Communications - Applied Technologies Division

2006 - 2007

Santa Barbara, CA

Security Clearance: Secret

- Developed a C# control encapsulating NASA's WorldWind 3D mapping application. Wrote algorithms to display shaded contours on WorldWind's globe.
- Exposed Unmanaged C++ algorithms and graphics packages for use in Managed C# code using both P/Invoke services and C++/CLI wrappers.
- Wrote a C++ application that provides nuclear effects simulation in real-time wargaming exercises for White Sands Missile Range.
- Wrote a COM object that provides source region electromagnetic pulse effects simulation (the thing that happens when a nuke goes off at low altitude).
- Wrote a parallel Monte Carlo electromagnetic simulation to compute damage probabilities.
- Wrote a finite difference time domain Maxwell's equations visualizer in C++.

Honors & Activities

Erdős number 2

2011

1st place, Mentor Graphics State Programming Competition

1997 and 1998

Developed Betsy, a master strength chess program, in C

1998 - 2003

Built Tesla coils and produced massive lightning bolts

1997 - 1999

Technical Skills

• Languages and Technologies

- C#, C/C++, JavaScript, Go, Python, Solidity, F#, Dart, Java, Pascal, VB.NET, Scheme, Fortran, x86 assembly
- LINQ, L^AT_EX, SQL, ASP.NET MVC, HTML, CSS, XML, XSLT, Bridge.NET, Google protobufs
- WinForms, WPF, Silverlight, Xamarin

• Development Tools and Platforms

- ANTS profiler, dotTrace
- .NET Reflector, dotPeek
- Visual Studio, Notepad++
- Git, Subversion, CVS
- Windows, Linux, Mac

Journal Refereeing

- Minds and Machines (2 papers)
- Synthese (2 papers)
- Journal of Philosophical Logic (1 paper)
- Journal of Combinatorial Theory, Series B (many papers)
- Combinatorica (many papers)
- Journal of Graph Theory (many papers)
- SIAM Journal on Discrete Mathematics (many papers)
- Discrete Math (many papers)
